

Precision Technology designs and manufactures innovative software and equipment to control tractors, implements and earthmoving equipment for optimal land and crop management. Our integrated solutions work across all phases of the management cycle:

- Land Levelling
- Irrigation and Drainage Earthworks
- Bed Forming
- Visual Guidance and Auto-Steering
- Planting and Variable Rate Control
- Spraying and Auto-Section Control
- Record Keeping

Precision Technology's management brings together more than 50 man-years of experience in farming, earthworks design, guidance, control and technological innovation. We work with our customers to continuously enhance our solutions to meet industry needs on six continents.

What professionals need - we deliver
